The most comprehensive book ever written on how to create the 4-note, block-chord approach to jazz piano playing used by masters like McCoy Tyner, Bill Evans, Barry Harris, Cedar Walton, etc. In this book, world-renowned pianist and educator Mark Levine provides a step-by-step, beginning to advanced, masterclass on how to create, practice and extend this most useful approach to jazz chord voicings.

The most highly acclaimed jazz piano method ever published! Over 300 pages with complete chapters on Intervals and triads, The major modes and II-V-I, 3-note voicings, Sus. and phrygian Chords, Adding notes to 3-note voicings, Tritone substitution, Left-hand voicings, Altering notes in left-hand Stride and Bud Powell voicings, Block chords, Comping ...and much more! Endorsed by Kenny Barron, Down Beat, Jamey Aebersold, etc.

Have you ever wondered how guitarists like Joe Pass, Jim Hall and Wes Montgomery find such full, luscious voicings for their chord melody playing? Well, much of that sound is based on the "Drop 2" principle of chord voicings. In this book, veteran guitarist Randy Vincent explains exactly how you can get that same sound too. Endorsed by Julian Lage, John Stowell, Larry Koonse, etc.

This special limited edition celebrates the 20th anniversary of the profound text that inspired thousands of musicians to reach that place in their music where performance became as effortless as drawing a breath. The beautiful foil-embossed cover, added chapters and articles, and foreword and testimonials by Herb Alpert, Quincy Jones, and others make this edition a timeless collectible to be displayed and treasured for a lifetime.

Playing the Changes on the Jazz Metaphor proposes an expanded view of the jazz metaphor in a broadened perspective that embraces a wide range of possibilities in organizational, management, and marketing-related themes. This monograph presents a new Typology of Jazz Musicians based on different kinds of artistic offerings. This typology will combine three key distinctions or dimensions to construct a twelve-fold classification that - when extended to the sphere of organizational behavior and business strategy as a Typology of Management and Marketing Styles - will shed light on different ways in which the jazz metaphor relates to organizational design, business practice, management skills, and marketing opportunities. In order to describe these typologies, the author examines important aspects of a first-level jazz metaphor as it relates to organizational issues involved in shaping the jazz improvisation into a form of collective collaboration. This is followed by attention to a second-level linguistic metaphor based on viewing jazz as a kind of language at the foundation for a collaborative conversation.

The Art of Inventing Hope offers an unprecedented, in-depth conversation between the world's most revered Holocaust survivor, Elie Wiesel, and a son of survivors, Howard Reich. During the last four years of Wiesel's life, he met frequently with Reich in New York, Chicago and Florida—and spoke often on the phone—to discuss the subject that linked them: both Wiesel and Reich's father, Robert Reich, were liberated from Buchenwald death camp on April 11, 1945. What had started as an interview assignment from the Chicago Tribune quickly evolved into a friendship and a partnership. Reich and Wiesel believed their colloquy represented a unique exchange between two generations deeply affected by a cataclysmic event. Wiesel said to Reich, "I've never done anything like this before." Here Wiesel—at the end of his life—looks back on his ideas and writings on the Holocaust, synthesizing them in his conversations with Reich. The insights that Wiesel offered and Reich illuminates can help the children and grandchildren of Holocaust survivors understand their painful inheritance, while inviting everyone else to partake of Wiesel's wisdom on life, ethics and morality.

The most highly-acclaimed jazz theory book ever published! Over 500 pages of comprehensive, but easy to understand text covering every aspect of how jazz is constructed—chord construction, II-V-I progressions, scale theory, chord/scale relationships, the blues, reharmonization, and much more. A required text in universities world-wide, translated into five languages, endorsed by Jamey Aebersold, James Moody, Dave Liebman, etc.

All great musicians have one thing in common—to a great extent they know what the harmony of a song is as they hear it. Do you? If not, here is a practical guide to get you up to speed. Written by Berklee professor Roberta Radley, it uses contemporary music to help you see how ear training is invaluable for your own musical needs.

Covers all styles of comping, from basic and fundamental approaches to modern! A complete collection of II/V7/I voicings for jazz keyboard, starting with simple diatonic voicings and progressing into more harmonically rich and diverse voicings with intricate passing tones and complex harmonies. No longer will you be stuck using the same kinds of voicings over and over, even in different styles. Now you can have a variety of II/V7 voicings available at your fingertips for every musical situation. 112 pages, spiral bound to lay flat when opened. "Luke's book on chord voicings is a gem . . . Luke shows you how to put it (jazz voicings) into practical 'street worthy' applications . . ." ---Frank Mantooth. "Easy to read, fun to play, and extremely useful for all instrumentalists." ---David Libbman "This book is a welcome addition to the jazz keyboard literature and offers a clearly presented, well organized approach to understanding and playing this most important harmonic formula." ---David Baker
