Originally published in 1992, this is a wide-ranging text concerned with the principles and practice of neuropsychological assessment in adults. It combines a flexible hypothesis testing approach to assessment with information on specialised test batteries. The book covers the major areas of memory, language, perception, attention, and executive dysfunctions, and includes chapters on dementia, alcohol, drug and toxic conditions, stroke and closed head injury. Assessment of dysfunction in cases involving claims for compensation and chapters on specialised assessment techniques, including automated test procedures, are provided. The book presents a sound introduction to this complex area and gives guidelines for the clinician who may need concise information on a specialised topic.

Chilton's original line of model-specific information covers older vehicles. Each manual offers repair and tune-up guidance designed for the weekend for the weekend mechanic, covering basic maintenance and troubleshooting. For the hobbyist or used car owner, this information is essential and unavailable elsewhere.

Presents historical background on ski mountaineering, which is climbing a mountain on skis and then skiing down the slopes, and offers tips on climbing and skiing specific mountains.

Vols. for 19 include Classified business directory of the entire state.
