The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

This Financial Accounting Workbook provides preformatted templates to facilitate efficient preparation of answers to all Basic and Involved Problems found in the textbook. The Financial Accounting book covers the accounting and reporting cycle, current assets, long-term assets, debt, equity, and cash flows. This material is typically covered in introductory accounting courses and is foundational for all accountants and business people.

This highly regarded reference is relied on by a considerable part of the accounting profession in their day-to-day work. This handbook is the first place many accountants look to find answers to practice questions. Its comprehensive scope is widely recognized and relied on. It is designed as a single reference source that provides answers to all reasonable questions on accounting and financial reporting

asked by accountants, auditors, bankers, lawyers, financial analysts, and other preparers and users of accounting information.
