This revised and expanded second edition of Implementing Inclusive Education shows how Commonwealth countries are attempting to undertake inclusion in education, and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all aspects of the education system.

This book provides a global and social examination of how disabilities are played out and experienced around the world. It presents auto-ethnographic perspectives on disability across cultures, societies, and countries by documenting individuals' personal narratives, thought processes and reflections. Chapter authors share cross-cultural perspectives within and across various countries, such as India, Australia, United States, Sri Lanka, United Kingdom, Croatia, Brazil, South Africa, and Qatar. Adopting a self-reflective stance following qualitative research methodology, the chapter authors discuss the current challenges in the field. Next, they deconstruct disability identities, explore the complexities of communication with differently abled persons, examine inclusive policies, practices and interventions and present insights from caregivers. The book concludes with critical reflections and a look to the future of global diversity and inclusion.
